Education

University of the East Caloocan - Caloocan, NCR

Bachelor of Science in Information Technology | Aug 2022 – June 2026

Experience

Software Developer Intern - National Telecommunication Commission (NTC), Quezon City, Metro Manila
Dec 2025 – Mar 2026

- Built an Android-based Optical Mark Recognition (OMR) app in Android studio using Kotlin and OpenCV to automate scoring of Radio Operations Examination exams, improving checking speed by **60%**.
- Incorporated the OpenCV library for detecting the shaded answers of the Radio Operations Examination exams achieving a **95%** detection accuracy.
- Delivered a fully documented codebase with handoff documentation to support continued maintenance and algorithm improvements.
- Assisted with laptop and PC setup, configuration, and troubleshooting to support day-to-day office operations.
- Provided technical assistance and IT standby support during meetings and organizational activities.

Projects

Hooked | Gdscrip, Dialogic2, Godot | Feb 2025 – July 2025

- Developed a 2D top-down cybersecurity awareness game in Godot using GDScript, achieving a **71.43%** increase in user cybersecurity knowledge.
- Implemented a custom Dialogic 2 dialogue system, reducing hard-coded text by **50%** and improving narrative flexibility by **35%**.
- Scripted animation state transitions and build UI components using Godot's node-based system.

Satzu YTdownloader | Java, YT-dlp, VLCJ library | Aug 2023 – Nov 2023

- Designed a Java application that utilized YT-dlp and FFmpeg to download and convert YouTube videos to user-specified formats (MP3/MP4) and quality settings.
- Integrated VLCJ to embed a native video player canvas, allowing users to preview videos before or after download.

Philippine Retail Price Data Analysis | Python, Pandas, Matplotlib, Google Colab | Sept 2025

- Conducted an exploratory data analysis on Philippine Statistics Authority retail data covering the most popular vegetable commodities across all regions.
- Engineered a data-cleaning pipeline using pandas melt, datetime parsing, and missing-value handling.
- Created trend visualizations to track commodity price fluctuations and regional price disparities over five years.

Technical Skills

Languages: Java, Kotlin, Python, C++, GDScript, SQL, PHP, JavaScript, HTML/CSS

Frameworks & Libraries: Pandas, Matplotlib, VLCJ, Dialogic, Bootstrap, OpenCV

Tools & Platforms: Git, GitHub Actions (CI/CD), Android Studio, IntelliJ IDEA, VS Code, Godot Engine, WordPress, Google Cloud Platform, Google Colab

Networking & Security: Basic Networking, Endpoint Security, Security and Connectivity Support

Certifications

Simplilearn SkillUp: Introduction to Software Architecture, Azure Fundamentals - Oct 2025

Cisco Networking Academy: Security and Connectivity Support, Endpoint Security - Sep 2025
